WB-PPVTDD380

PowerPhone V/TDD-380 VCO Amplified Telephone

A full-featured TTY and amplified phone all in one

FAQ

How to select an amplified phone?

The PowerPhone V/TDD-380 is a full-featured VCO telephone and digital answering machine that records both TTY and voice calls. A speakerphone is included for VCO users. The incoming call is answered with both a voice and TTY greeting, and then the voice or TTY incoming message is recorded (hearing callers can press a key to bypass the TTY tones). Playing back the messages is easy. Voice messages play out the speaker and TTY messages display on the LCD screen.

Features

- Answering Machine
- Digital answering machine for voice and TTY
- New message waiting indicator
- Time/date stamp for both voice and TTY messages
- Remote message retrieval
- Speakerphone
- Stores 20 telephone numbers for one-touch dialing

**Telephone
WB-UP1140**

Uniphone 1140 VCO Amplified Telephone

Item	Description	Photo Click to enlarge	Price
<p>WB-CIDVA</p> <p>FAQ How to select an amplified phone?</p> <p>How to get the best tone from a CrystalTone phone?</p>	<p>Caller ID with Voice Announcer</p> <p style="text-align: center;">Caller ID and Call Waiting‡ Functions</p> <p>This Caller ID box uses patented Voice Announcer technology to announce calls over its built-in speaker or over the handset of a cordless phone. This technological breakthrough gives Caller ID subscribers the ability to screen calls without the interruptions and inconvenience imposed by traditional, display-only Caller ID equipment and is ideal for people with low vision.</p> <p>Features</p> <ul style="list-style-type: none"> • Voice announces caller's telephone number or recorded name • Easy-to-read 3-line LCD (displays name, number, date, & time) • Call waiting ID‡ • Deliver outgoing messages for specific callers • Adjustable volume control • 4 AA batteries (included) • AC power option <p>‡ Requires Caller ID or Call Waiting service from your phone company</p>		<p>\$69.95</p>
<p>WB-FCIDB</p> <p>FAQ How to select an amplified phone?</p> <p>How to get the best tone from a CrystalTone phone?</p>	<p>Fanstel Caller ID Box</p> <p style="text-align: center;">Caller ID and Call Waiting‡ Functions</p> <p>You'll never need to move from your chair or desk to see who is calling. The name of an incoming caller is displayed twice as large for easier recognition of incoming calls. Once the phone is picked up, the display returns to normal size.</p> <p>Options</p> <ul style="list-style-type: none"> • High contrast LCD display • Caller ID & call-waiting ID functions‡ • 99 name and number call memory • Dial flash, delete, forward, review, and backward review buttons • Automatic stutter tone detection • Visual message waiting indication <p>‡ Requires service from your phone company</p>		<p>\$29.95</p>

An Internet Call Waiting ID‡ device

The HotCall 4000 is an Internet Call Waiting ID‡ device. Now you can be online and see who's calling - at the same time. It displays the name and number for incoming calls. If you decide to take the call, just answer the phone. If you decide not to take the call, the HotCall 4000 will maintain your Internet connection. You can easily return the call later by pressing the "Call Back" button.

Options

- Displays name & number for incoming calls
- Date & time display
- Auto Call Back lets you return a call with a single button
- 99-call memory
- Displays in English, Spanish, or French
- Contrast control
- New call indicator
- Uses AC power

‡ Requires Call Waiting Caller ID service from your phone company.

[Which is right for you?](#)

Simplicity Telephone Ring Signalers

Also see combination [Telephone/Doorbell Signaler](#) which is a cost-effective way to signal both sounds. These signalers plug directly into the telephone line then alert you when you receive a call. Choose from two styles: wall-mount or desktop. Both models can flash a plugged-in lamp to alert you. As an alternative, the wall-mount models can be used with the optional Add-On Strobe. This makes the wall-mount models ideal for areas where a lamp is impractical such as in small areas like hallways and dorm rooms. Choose the signaler with the right combination of features for you.

Model Guide

- **L** - Flashes plugged- in lamp.
- **T** - Transmits to Remote Receiver
- **D** - Desktop model
- **W** - Wireless Doorbell capabilities

Accessory

Simplicity Telephone/Door Signaler

Alerts you to incoming calls or someone at the door

[← Back to Alert & Signal](#)

Item	Description	Photo	Price
UT-LTW	<p>Simplicity Telephone/Door Signaler</p> <p>This all-in-one signaler lets you know when the telephone is ringing or when someone is at the door by flashing a plugged in lamp or Add-On Strobe. It can also signal Remote Receivers which flash lights in other rooms. Unique flash patterns help you identify which sound is occurring. This signaler is ideal for people who want a cost-effective way to be signaled to both the telephone and the doorbell.</p> <p>Installation is easy with this wireless signaler. Simply install the wireless doorbell button (included) if you do not already have a doorbell in your home. You can also upgrade an existing doorbell to work with the Signaler by connecting a few simple wires to the included transmitter.</p> <p>What the Model Names Mean: L - Flashes plugged- in lamp T - Transmits to Remote Receiver W - Wireless Doorbell capabilities</p> <p>Features</p> <ul style="list-style-type: none"> • Lets you know when the telephone is ringing or someone is at the door • Transmits signal to Remote Receivers, alerting you to sound throughout the home or workplace • Wireless Doorbell component -- no messy wires, no complicated installation • Works in homes with or without existing doorbell systems • Plugs directly into the telephone line • Different lamp flash patterns for the telephone and doorbell • Can be used with Add-On Strobe for signaling in areas where a lamp is not traditionally used. 		\$109.95

All the Simplicity components work together to alert you anywhere in your home or workspace. Mix and match the components you need choosing from two styles: wall-mount or desktop (desktop models available soon!). Compatible with any of the Simplicity signalers (Doorbell, Sound or Telephone Ring), the Remote Receivers flash a lamp or strobe to alert you to sounds throughout the house. Different flashing patterns make it easy to tell which signaler has sent the transmission.

*A Ringer Equivalence Number (REN) is a number assigned to every device (fax machine, telephone, answering machine, TDD, computer modem, signalers, etc.) that connects to your telephone service. Each device plugged into your telephone line will draw power. Once you have exceeded the amount of power given by your telephone company, many of the devices plugged in will not ring. Sonic Alert telephone signalers have the lowest Ringer Equivalence Numbers in the industry.

Features	TR 100	TR 75	TR55	TR 50
Ringer equivalence number (REN)*	1.0	0.0	1.0	1.0
Indicator light (turn lamp on reminder)	No	Yes	Yes	Yes
Sends signal to remote receivers to flash lights in other rooms	Yes	Yes	Yes	No
Has switch to allow lamp to be used for signaling and normal room lighting	No	Yes	No	No

Sonic Alert Remote Receivers

Any lamp plugged it into a remote receiver can alert you

Item	Description	Photo Click to enlarge	Price
<p>How signaling systems work</p> <p>Which is right for you?</p>	<p>Sonic Alert Remote Receivers</p> <p>Any lamp in your home can alert you if you plug it into a Remote Receiver. These Remote Receivers pick up signals from the transmitting signalers (door, telephone, baby, etc.) and flash lights accordingly. The Remote Horn will alert you by sounding a loud (78-85 dB), low frequency horn.</p> <p>Features</p> <ul style="list-style-type: none"> • May be moved from room to room • You can use as many receivers as you need 		
<p>Sonic Blink WB-BL300</p>	<p>Sonic Blink</p> <p>The Sonic Blink, model BL 300 is the latest compact receiver and features a built-in, high intensity strobe light for signaling. The strobe light projects 360 degrees when flashing to eliminate blind spots. The Sonic Blink is perfect for places where a lamp is normally not used, such as in bathrooms, dining rooms and hallways. It can even be placed behind objects such as furniture.</p> <p>Features</p> <ul style="list-style-type: none"> • No lamp or light needed • No cords • Flashes 20 times per second • Easy to use – just plug it in 		<p>Blink \$49.95</p>
<p>Sonic Informer WB-SA201</p>	<p>Sonic Informer</p> <p>The newly redesigned Sonic Informer, model SA 101 will alert you by flashing any attached lamp. The lamp plugged into the SA 101 can only be used for signaling. It is ideal for use in kitchens, bathrooms, or anywhere an extra lamp is not needed for lighting. There is also an indicator light to remind you to turn on the attached lamp. A Super Shaker SS 120V bed vibrator can also be plugged into the SA 101.</p>		<p>Informer \$34.95</p>

Sonic Informer

Sonic Link
WB-SA101

Sonic Link

The Sonic Link, model SA 201 with its sleek, modern case will alert you by flashing any lamp that is plugged into its Pluglet (Plug-outlet). The Pluglet allows you to keep your table uncluttered by unsightly lamp cords. The signaling lamp can also be used for normal room lighting by using the lamp on/off switch. There is also an indicator light to remind you to turn on the attached lamp.

Link
