Computer Access Software

For users who want to "type" (send keystrokes) to a Windows application but cannot use a standard keyboard due to a physical disability

Item	Description	Photo Click to enlarge	Price
GS-GAK	<p>Gus! Access Keyboard Unmatched ability to allow typing in Windows 95-XP or Windows applications</p> <p>Click on each item to expand: How do I use it?</p> <p>3 Features Simplify Typing</p> <ul style="list-style-type: none"> • Word Prediction (guesses the next word) • Abbreviation Expansion (expands a few characters into a word/sentence) • Speech output (Microsoft Speech Synthesizer included!) <p>Seamless Integration:</p> <ul style="list-style-type: none"> • Integrated World Wide Web Navigation (an industry first!) • Start Menu and task switching in a Task bar application • Embedded links to cursor control and communication software 		\$495.00
GS-PKPPC	<p>Gus! Pocket Keyboard for Pocket PCs Unmatched ability to allow typing in Windows 95-XP or Windows applications</p> <p>This On-screen keyboard for Pocket PCs will greatly improve your keystroke entry speed and efficiency with our embedded word prediction feature. As you begin typing a new word, the word prediction box presents an easy to view list of words to choose from. If the word you are typing is not on the list, it will add it automatically so it is there for you the next time! It is the most helpful Pocket PC keyboard available today.</p>		\$135.00

GS-SC

Gus! Scanning Cursor

Activate mouse buttons by scanning with 1 or 2 switches

\$195.00

[Details](#)

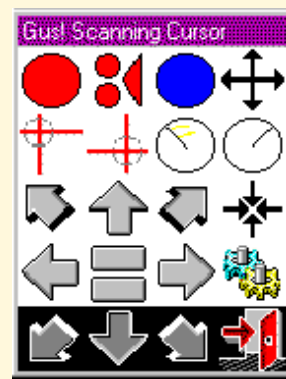

What does it do?

This program is designed for anyone who cannot move a mouse or press the mouse buttons. Gus! Scanning Cursor moves the cursor for you and provides an interface to activate the mouse buttons using 1 or 2 switches. If you don't have a switch, simple use the left mouse button as your switch.

How Does It Work?:

- Using a single switch (or left mouse button), select one of the Vertical/horizontal ("crosshair") or the a Rotating ("radar") options from the second row. You may increase/decrease the speed by pressing PgUp/PgDn. The first 2 are "crosshair" options... the second 2 are "radar" options (see below).
- Wait until the line is over your target and press the switch (or left mouse button). You may increase/decrease the speed by pressing PgUp/PgDn. *Note: the adjustments will not be recorded until it rotates 360 degrees*
- Wait until the cursor is over your target and press the switch (or left mouse button). You may increase/decrease the cursor speed by pressing PgUp/PgDn. With the cursor over the target, press the switch again, then select the mouse action from the first row of choices.

GS-WP

Gus! Word Prediction

Predicts the word you intend from currently typed letters

\$295.00

[Details](#)

Gus! Word Prediction greatly improves typing speed by offering a list of words based on what keys the user has already typed. As each key is typed, the list changes accordingly and predicts the current word (word completion) the user is trying to enter. It also predicts the next word (word prediction) and offers "abbreviation expansion" and speech output!

[Details](#)

Features:

- Word Completion
- Word Prediction
- Abbreviation Expansion
- Spell Checker
- Speech Output
- Dictionary of over 100,000 words

Gus! Dwell Cursor

For users with difficulty accessing standard mouse buttons who uses a "head pointing devices"

[Details](#)

Gus! Dwell Cursor provides a practical method of activating mouse button clicks (click, double click etc.) for users who have difficulty accessing standard mouse buttons, or someone who uses one of the new "head pointing devices" that remotely control the cursor.

\$125.00

[Details](#)

Simply move the cursor over top of the item you want to "click", and Gus! Dwell Cursor automatically does the mouse clicking for you!

[Details](#)

GS-JM

Gus! Joystick Mouse

For users with difficulty accessing standard mouse buttons who uses a "head pointing devices"

[Details](#)

A simple, effective, inexpensive solution that allows a common joystick or game pad (game controller) to control the cursor... just like a mouse!!

\$85.00

[Details](#)

[Details](#)

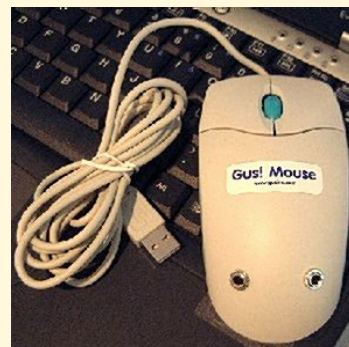

GS-JM

Gus! USB Mouse

With scroll wheel and 2 switch interfaces

For switch/scanning users. Its a Windows compatible mouse and a PC switch interface (1 or 2 switches) in a single unit! Does both jobs at the same time! No need to buy an expensive "switch interface box"

\$175.00

Picture It Boost literacy and self-esteem!

Picture It version 4.2 is the easiest and fastest software one can use to add pictures to text. Create a picture-rich environment! Students struggling to understand print can have successful literacy experiences every day using picture-supported materials. Any curriculum can be adapted using Picture It, because materials can be presented at a level which the individual reader can understand. Spanish is a built in capability.

Includes over 6000 Literacy Support Symbols with both black and white and color versions. Add even more ...clip art, photos, import your special ones. These materials have been used successfully by individuals who have a wide range of needs, including moderate to severe cognitive delays, speech/language disorders, hearing impairments, learning disabilities, visual disabilities, fragile X, TBI, severe speech and physical impairments, autism, and English as a second language. Use the power of your computer to find and format picture symbols with text. Print documents for use in inclusive or self-contained classrooms.

WordQ 2 - English (Canada - UK - US)

Predict It - Hear It - Choose It - Review It - Correct It - Write It Now

Item	Description	Photo	Price	
User Stories	WordQ 2		WordQ 2 \$225.00	
Uses & Tips	What can I do with WordQ?			
Testimonials	You can use WordQ along with any standard writing software (e.g., Microsoft Word, WordPad, Notepad, or Outlook). When you type a letter, WordQ predicts what you might want to write and displays a list of correctly spelled words from which you can choose. When you see the word you want, you can choose it with a single keystroke or with the mouse. If you need help deciding which word to use, each word can be read aloud before you make a selection.			Upgrade from WordQ 1 \$75.00
Support				
WordQ2-English				
1 Computer WQ-WQ2E1	When you've finished typing your sentence, WordQ can read it back to you. Then you can hear if there are any mistakes such as missing words or punctuation. Often you can hear mistakes that you can't see.			
5 Computers WQ-WQ2E5	Word Prediction

1 Computer WQ-WQ2E1U				
5 Computers WQ-WQ2E5U				
10 Computers WQ-WQ2E10U				
School Site WQ-WQ2ESU				
SpeakQ English				
WordQ 1 Deutsch	Several starting user vocabularies are included (using Canadian, UK, or US spelling) at different writing and age levels. These are like the words in your head. WordQ continually learns how you use words so that it improves over time. If you want to write about a specific area, you can create and use specialized topic lists to make the predictions even better. Different people can also use WordQ, each with their own user vocabulary.			
WordQ 1 Français				

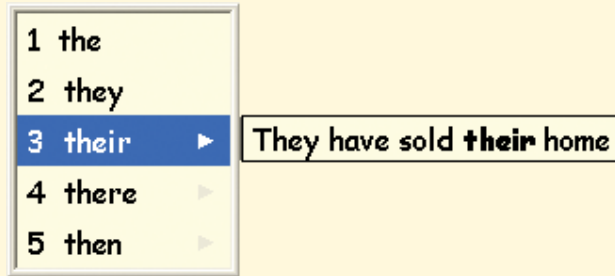

Key Benefits

- Simple, easy-to-use writing support increases productivity, independence, self-confidence & motivation
- Work directly within any Windows® 98 – XP standard application
- Use predicted words as you write to help you spell
- Hear predicted words spoken to help you choose
- Select predicted words with a single keystroke or a mouse
- Hear what you type for spell checking and word flow
- Proofread your writing with highlighting and speech
- Use a self-adapting prediction vocabulary that matches your age and writing level
- Expand, focus, or limit your prediction vocabulary
- Customize how you see predictions
- Usable across all ages
- Affordable

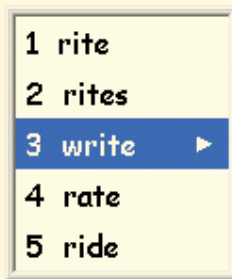

WordQ 2 Advantages

- A high-quality natural sounding text-to-speech engine by the Acapela Group is included so that text is more clearly heard
- In-context prediction makes corrections easier by displaying appropriate word predictions wherever the text cursor is placed, even when the cursor is in the middle of a word
- A temporarily disappearing word prediction box allows you to move through your documents without distraction while holding down any arrow key
- Usage examples with speech feedback of commonly confused words, such as “there” and “their,” helps you distinguish such words

- Creative spelling is now optionally considered as you type when predicting words to show you spellchecked suggestions

rite|

- Saving user vocabularies and usage examples as an independent file allows easier editing and sharing with other users

WordQ v2.2 Improvements

- An option has been added to permit users in school settings to store their WordQ vocabulary files (and, if using the SpeakQ speech recognition plug-in, their speech files) on a central server instead of the local workstation. This capability permits a student to move from workstation to workstation and have access to their WordQ/SpeakQ settings available wherever they log in. Network administrators can find out more about enabling this option by viewing the FAQ WordQ v2.2 and SpeakQ v1.2 Network Installation
- The Acapela text-to-speech engine has been upgraded to address a potential incompatibility with other applications using Acapela's text-to-speech products.

- Fill in missing letters from the alphabet
- Select the correct word for pictures
- Type in or select from the screen the correct letters to spell the word shown in the picture
- Finally the words are presented in Word Search and Crossword layouts
- All activities have 3 levels of difficulty
- The Learn More Toolkit (included) allows you to edit the wordlist.
- Add words, delete them or re-assign difficulty levels.
- Attach different pictures or sound files to words and even create your own new wordlists.

Looking for Words

Explore community, home and school

5 Users
AC-LW-57

Community exploration program combines reasoning skills with vocabulary building. Excellent for reading enrichment. Engaging graphics, interesting animation and clear speech help teach hundreds of words in context. Features "explore," "list," and "picture print" options. In "explore," students freely move to different locations, 24 in all, learning new words as they go. Select any object and it identifies itself. In "list" option, students search for specific words on their list. Where would you find a basketball, broom or mailbox? How about a fire hydrant, fire truck or toaster?

Use the "picture print" option to create student activities or illustrated vocabulary booklets. New feature lets teachers select specific words on student lists. Scores are saved to track skill development.

Real World Picture Words Software: 6 Programs

RWPWS 1
PC-1222
Sample

6 software programs, by Janie Haugen-McLane, help students with limited or no reading skills learn commonly used words heard in everyday life. The 1200 picture words have full-color illustrations and are taught in groups of five to increase comprehension and retention. Simple, easy-to-understand definitions and sentences are read aloud for each word, giving students both general and "real-world" meanings.

Sequence of Activities

Each picture word is introduced with its matching illustration. Once the word is read aloud, a series of activities helps students learn to identify, pronounce, define, and use the word.

Students will:

- Learn each word and its definition. Then, hear each word used in a sentence.
- Choose the correct picture and word from 2 choices and then 3 choices.
- Finally, identify each word and its picture from 5 choices.

Survival Signs: Safety Signs

Essential signs for safety!

5 Users
AC-CN-35

These flash cards help students recognize and understand 75 common signs, symbols and words. One side shows an illustrated sign, the other describes it and where you might find it - like an elevator or doorway. The 3"x6" cards are ideal for individual or small group activity. Includes 75 flash cards with storage box. Covers those essential safety signs and words found in your community. The 80 words in this program include important words from *Danger*, *Fragile* and *Exit* to *Poison* and *Stop*.
