TF-2145 Branch

Branch

Grades K-13, Inclusion

[Details](#)

Students are encouraged to sort and classify information as they formulate "yes" or "no" questions to divide and subdivide information. Banks of words, pictures and sounds make the program fun and imaginative. Simple mouse clicks add information to the database, and easy steps lead users to categorize entered data. The result is a logical structure that can be saved or printed out for projects, bulletin boards, and work away from the computer. Zoom in and out, view work as a map, or edit questions through a clearly designed tool bar. Students have full control over their branching databases. An inspiring tool for any academic subject.

Minimum system requirements

TF-2118 Database

Database

Grades K-13, Inclusion

[Details](#)

Have you ever heard a database sing? At the click of a mouse you can enhance any Database with pictures, video, and sound effects. Students can take surveys, and build their own database in a matter of minutes. This is an incredible program for making a photo album, collecting science data, building an address book, or making a cookbook. There's a fantastic graphing feature that lets you build three dimensional charts and graphs, with colorful backgrounds. Extensive search and sorting capabilities give you the power to quickly wrangle large amounts of information with ease. Any database can be viewed as a list or spreadsheet to quickly show all the records at once.

Database supports a wide range of file formats, making it ideal for use with a digital camera, scanner, or any clip art. The program is fully configurable for any age level or learning ability.

Minimum system requirements

Win 95/98/ME/2000/XP, Pentium, 32 MB RAM, 4x CD, 800 x 600, 16 bit color

TF-2003 Disappearing World

Grades 7-13+, Win

Details

Here is a rare and exciting opportunity for your students to become anthropologists! Highly informative videos and narration introduce 8 fascinating societies in nearly forgotten corners of the world. Societies can be explored by themes including: making a living, men and women, wealth, knowledge and power, and religion and belief. The rich collection of images and commentary are an invaluable resource for Geography and Social Studies curriculums. A second disc offers printable materials that lead students through case studies, comparisons, and data collection.

TF-2004 Exploring World Religions

Grades 5-10, Win/Mac

Details

This is a rare and exciting opportunity for students to learn about the beliefs and customs that shape the lives of people in America and across the globe. Students hear personal perspectives from children representing each religion. Six major religions; Buddhism, Christianity, Hinduism, Islam, Judaism, and Sikhism are explored through photo tours, text, and narration. A simple and attractive interface offers keys into the places, holy writings, special days, people, and beliefs of each religion. The tool chest contains links to the menu, the index, and a notebook in which students can compose thoughts and observations about what they are learning. When difficult words are encountered in the text, simply highlighting them produces a quick definition. Individual learners or teams can challenge their new knowledge with a multiple-choice quiz. Website links and printable support material make this software a complete educational package for any Social Studies curriculum.

Minimum system requirements

TF-1703 Kiloran Bay: Viking Pack

Grades 3-7, Win/Mac

Details

Part of the [Celtic Culture Pack](#). Marauding Vikings are easily imagined - over 1,000 years have passed since a Viking man was buried in his Longboat, and now your students have the rare opportunity to examine the remains. This interactive program makes investigation of a highly significant Viking burial at Kiloran Bay possible for budding historians and archeologists. Students examine artifacts and use evidence to draw their own conclusions about the man and Viking society. They dig deeper to answer key questions as they enjoy amazing animations, audio clips, and archeological reconstructions. A printable teacher's guide is also included.

The World War 1 Archive [More on WW I](#) Grades 9-12+

The World War I Archive is an invaluable resource for students and teachers of history. The huge database contains photographs, letters, audio interviews, cartoons, posters, and many original documents. Much of this material was in fact supplied by war veterans and their families. The three sections of the CD-ROM; Chronology of War, Aspects of War, and Personal Perspectives look closely at people, events, and important topics related to the war. A website link gives students access to additional resources from websites around the world. All material in this phenomenal program can be easily accessed through on-screen indexes. The Odyssey Scrapbook lets students save selected files for future viewing, and allows students to build presentations.

World War II- Sources and Analysis

More WW 2

Grades 9-12+

This program is the second in a series that offers the most comprehensive analysis of World War II available. Browse through a huge database of documents, photographs, audio clips, posters, films, political cartoons, private letters and diaries relating to the many aspects of the war. With over 1,000 sources students have an invaluable tools for analysis of events and issues that had major impact on the war. Students can access the wealth of information by using the source filter or by exploring case studies and themes. Features such as an index, glossary, and tool for comparing facilitate navigation of the program. The Trailsave feature makes it possible for students to gather slides from the disc in order to collect data or prepare a presentation.
