## Vocalization & Auditory Learning

Item	Description	Photo	Price
TF-7637	Listen Hear!  Special Education  Listen Hear provides auditory stimulation by playing over 90 recorded sounds. Sounds can be manipulated with a variety of effects including moving from left to right speaker and moving in and out. Sounds can be played momentarily when the mouse button is pressed or played in a continuous loop until stopped. Experiment with creating your own sound effects using a microphone and the sound recorder in Windows! A wonderful program for individuals needing auditory stimulation.  Win 95, Pentium	No Photo	1 User <b>\$69.95</b>  5 Users <b>\$209.85</b>
TF-2095	Musical Leaps and Bounds Grades Kindergarten-1, Inclusion Best Software for Kids, 2004, Museum of Science Boston  In My Band, listen to a mixture of timbre, dynamics, and texture using instruments ranging from a guitar to tubular bells. Sequence singing characters however you like to compose new tunes and choreograph dance routines in Let's Dance. The concept of pitch is introduced in Up and Down with a series of amusing monsters. The taller the monster, the higher the sound he makes! Kids move characters closer or further away to make corresponding sounds get quieter or louder as they experiment with dynamics in Mixing Desk. Create scary, serene, angry, happy, and other songs in Moody Jukebox, where the influence of musical textures and dynamics on mood is demonstrated. The Singing Blobs are fun characters that each play a unique note when clicked, and a sustained note when the button is held down.  Minimum system requirements Win 95, Pentium 133 MHz, 32MB RAM, 800 x 600, 16 bit color Mac OS 8.5, 68040, 4x CD, 800 x 600		1 User <b>\$44.95</b>  5 Users <b>\$134.85</b>  25 Users <b>\$449.50</b>
ST-OMCD	Old MacDonald's Farm Deluxe  Toddlers, preschoolers, and early elementary students will be captivated and motivated by the animals in this delightful program. Students sing the song selecting their favorite animal or explore animal sounds and shapes. All students in the class will have fun on this farm.  256 RAM Win 98-XP Mac OS8.1-9.2/OS Classic		1 User <b>\$109.00</b>  5 Users <b>\$450.00</b>

[Details](#)

This CD was written by a mother of 2 autistic boys who is an Occupational Therapist, and co-written by a Music Therapist as a fun way for parents, teachers and therapists to help children with auditory sensitivity and fear of loud noises. It combines rhythm with sounds that can be upsetting to many children. This unique collection gives children control of the sounds and lets them know exactly what to expect to hear at school!

Encourage your child to begin at a low volume and gradually increase it. It is our goal that your child has fun while developing tolerance for loud noises.

School-Eaze includes the following sounds: school fire drill, cafeteria, bus ride, gym class, changing class bell, swim meet, classroom noise/group of people talking, and field trips such as baseball game, restaurant, carnival, walking to school/construction site, parade, party, movies, and stock car race.

We take pride that we create, produce and sell our own CDs. 10% off multiple CD orders!

### Smart Alex

Special Education, Win/Mac (separate CDs)

[Details](#)

There are 8 different levels to choose from, making this an easy program to adapt to the needs of various students. At the first level, students click on Alex's mouth and eyes to change his facial expressions. Higher levels allow students to choose emotions and tell Alex to express them by selecting from Mayer-Johnson and Rebus Symbols. Alex can express emotions such as fear, anger, happiness, confusion, boredom, shyness, curiosity, courage, and frustration.

### Sound Beginnings

Grades Kindergarten-1, Inclusion

[Details](#)

This is a must-have for speech therapy. Using a microphone, the student's voice controls the actions of characters on the screen. Say "Giggle" and the zany character will laugh! Play the space game, and raise and lower the pitch of your voice to avoid getting hit by enemy critters. This is the ultimate program for early learners and children who have difficulties in vocalizing sounds.

Minimum system requirements

Win 95+, Pentium 200MHz, 64MB RAM, 800x600, sound card, headphones or speakers

### Sound Eaze

This CD was written by an Occupational Therapist and a Music Therapist as a fun way for parents, teachers and therapists to help children with auditory sensitivity and fear of loud noises. It combines vocals and rhythm with sounds that can be upsetting to many children. The music and rhythm are eased out until only the sound remains. Allowing your child to adjust the volume may give the feeling that he/she is in control of the sound.

Encourage your child to begin at a low volume and gradually increase it. It is our goal that your child has fun while developing tolerance for loud noises.

Sounds included are: baby cry, vacuum cleaner, fireworks, dog bark, siren, phone ring, thunder, fire alarm, blender, hairdryer, lawnmower, toilet flush.

We take pride that we create, produce and sell our own CDs. 10% off multiple CD orders!

\$15.99

### Speak Up!

Special Education, Win, microphone, accessible

Ideal for speech therapy, 10 different images grow, move, and get wider as the user makes sounds into a microphone. The image also changes according to the volume of sound made by the user. Categories include: circles, diamond, pyramid, rectangle, bars up, bars right, Manhattan, line, snake, and thick snake. You can also load your own pictures into the program. Imagine using a photograph of your dog or another fun subject and making it grow and move! Save the image for later use. Accessible by microphone.
