### *Additional Facts*

- Includes batteries
- Touch sensors give our optical mouse the ability to “sleep” when not in use, which results in longer battery life.
- Mouse “sleeps” after 8 minutes of non use.
- The mouse’s optical sensing technology provides greater accuracy and control when “mousing” on any surface, not just a mouse pad.
- Includes PS/2 connection
- Software provided for Windows 95 and 98:
