ChooseIt! Ready-Mades Numeracy Series

Great pre-made ChooseIt! Maker 2 activities, ready-to-run!
Individual programs described & available below.

5 Users
IT-CH55

Another numeracy title in the ChooseIt! Ready-Mades Numeracy Series, this CD-ROM features 23 graded activities covering odd one out sets, counting sets, counting on (rote counting), numeral recognition, more than, less than and simple addition up to 10.

Details

Each of the activities consists of a graded sequence of 20 to 40 simply presented multiple-choice questions. Correct answers result in a short animated sequence with music and spoken reinforcement while a fun 'monkey story' game adds to the motivation. Full speech support and switch access options provide access to learning by almost all students and simple performance reporting allows you to record student progress.

These activities were designed by a teacher and Maths Information and Communication Technology Coordinator with over 20 years experience in primary and special schools.

The activities are structured using a positive reinforcement strategy without the need for intrusive onscreen help. Should the activity content not quite fit your specific needs, you can modify them using ChooseIt! Maker 2.

ChooseIt! Maker 2 is very easy to use and allows you to change the text, the pictures, the speech or music in an activity. You can also use each of these CD-ROMs on their own.

TF-2196 Speech Language Bundle

Grades Kindergarten-8, Inclusion, Win/Mac, Retail value \$480

Speech and language pathologists will fall in love with Speech/Language Bundle! Seven different titles integrate speech into educational games and learning activities. Students use their voice in selected ways to control funny characters on the screen. Use pitch, tone, volume, and rhythm to activate the engaging learning exercises. Record your own speech and customize reading comprehension and spelling programs to match the ability level of the learner. Each program employs the use of voice in a different way. Enthusiasm and creativity bursts out of this package – you'll have trouble keeping your students away!

TF-2091 Touch It Series 5 CD Set

Special Ed.

Early learners and those with moderate to severe difficulties will develop hand-eye coordination skills by touching objects to eliminate them as they travel across the screen. Adjust the pointer size, number of objects, speed, and even designate random selection.

Includes

Touch It Food

Food objects include: apple, fries, orange, pie, grapes, carrots, bread, bananas, milk, tomato, potato, muffins, juice, onion, and cheese. You'll be hungry after playing!

Touch It Everyday Objects

Develop hand-eye coordination by touching articles of clothing to explode them, as they travel across the screen. Adjust the pointer size, speed, number of objects, and even designate random selection. Every day objects include: bulb, bag, basket, table, phone, flowers, computer, chair, washer, comb, sofa, guitar, book, microwave, and iron.

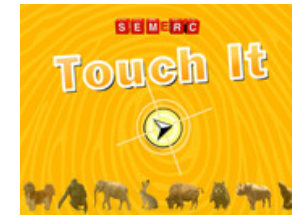

Touch It Clothes

Develop hand-eye coordination by touching articles of clothing to explode them, as they travel across the screen. Adjust the pointer size, speed, number of objects, and even designate random selection. Articles of clothing include: gloves, jeans, sweater, skirt, t-shirt, hat, shoes, jacket, baseball cap, sandal, trainers, boots, coat, shirt, and dress.

Touch It Animals

Students develop hand-eye coordination skills by touching animals to eliminate them, as they travel across the screen. Adjust the pointer size, speed, number of objects, and even designate random selection. Wild and farm animals included. Animals include elephant, dog, owl, giraffe, gorilla, sea lion, bison, rhino, rabbit, pigeon, reindeer, seagull, crab, sheep, and llama.

TF-2136 Whole Class Series

Grades Kindergarten-6, Win/Mac

The products in this series have special qualities that make them ideal for use in a whole class teaching situation. Classrooms that are equipped with a projector, white board, or even just a single computer will benefit from the Whole Class Teaching Series. Each program is built with clear graphics and larger text that can easily be read by students sitting in the back of the classroom.

Gather students around a demonstration screen and get them involved in the learning process. Each activity demonstrates a single concept in one or more ways. There are models to invoke questions and lively discussion from the class. Animated activities display cause and effect. Your class can make group decisions, then see the results played out on the screen. Each activity is designed to demonstrate a core concept or skill in a visual way.

Leave the clumsiness of the chalkboard behind, and expand the possibilities for learning with the Whole Class Series. You'll project a whole new vision of learning in the classroom.

Includes (links below to details):

- [Whole Class Decimals](#)
- [Whole Class Fractions](#)
- [Whole Class Fresco](#)
- [Whole Class Number Connections](#)
- [Whole Class Percentages](#)
