Teach work skills at the computer

5 CDs
AC-CW57

- Vocational software that's ideal for long term training of school to work students.
- Focuses on actual computer skills that prepare users for office jobs.
- **Computers at Work**, which **includes Data Entry and Order Processing**, challenges students to work independently for an hour or more while learning real office procedures.
- **3 levels of difficulty**, working independently for an hour or more while learning real office procedures. As skills improve, users progress from simple tasks to jobs common in today's workplace:
- A **student tracking system** provides data needed for IEPs/Transitions Plans
- Student results for each session are recorded and long term performance is tabulated
- A System Manager is included to track student performance and provide data for IEPs/Transition Plans.
- Win/Mac CD, 190 Data Entry account cards, 190 Order Processing account cards.

Logo with all the appeal of the original adventure and much more.

Logo is a simple computing language that was originally designed for teaching of mathematical ideas to children through computer programming. However, its flexible nature allows Logo to be used creatively and imaginatively as a teaching and learning resource across many different subject areas. It lends itself especially to problem solving. Crystal Rain Forest V2 introduces and extends the use of Logo and encourages the development of the skills required for effective problem solving.

Minimum system requirements

Win 95+, Pentium 233 MHz, 64 MB RAM, sound card
Mac OS 8.6+, OSX

TF-2215 Email Detectives

Grades 2-5, Inclusion

Within a safe, simulated environment, pupils are taught a range of relevant email skills and knowledge through a series of narrated, interactive tutorials. Pupils can then practice and consolidate these skills via an exciting adventure.

Contents:

- What is email?
- Receiving and sending messages
- Using an address book
- Replying to a message
- Adding and opening attachments
- Annotating messages
- Sending carbon copies

Win 95 or later, Pentium 166MHz, 32 MB RAM, 16 bit color, sound card

IT-MO05

Details

A series of activities specially designed to teach mouse skills in an entertaining and visually appealing atmosphere. Students are taken stage by stage through the many applications of the mouse. Move the mouse over an object, drag and drop, drag along a path and the use of drop-down menus are all represented. Various clicking activities can be found such as clicking anywhere, click timing and double-clicking.

Introductions to each activity are provided and the successful completion of a task is met with a range of pleasing rewards.

Many games options are configurable, such as the complexity of the task. Background graphics may be switched off to provide a high contrast visual appearance. Colors, sound effects and background music may be similarly customized.

TF-2150 Keyboarding Adventure

Grades 1-6

Details

Bundle

Research

Discover the Australian outback with your animated young guide Kewala the Koala. Kewala has a lot to learn of the dangers of the outback, and as you type he discovers more and more dangers! Hurry! Type faster so Kewala will survive his journey and make it to the Kingdom of Eaz. With clever commentary, 2,500 animations, 20 characters, and music, Kewala motivates children to keep typing without ever knowing that they are learning!

Keyboarding Adventure is structured of 10 different challenges. The first 8 adventures teach you to type with 10 fingers and the ability to read as you are typing. The program also illustrates proper posture and hand positioning so as not to develop bad habits from the beginning. The 9th and 10th challenges develop speed and accuracy.

Research

Over 4 million people have been trained worldwide with this system. Appropriate for students, teachers and parents alike, Keyboarding Skills monitors every keystroke to create a personal course for every learner so that keyboarding skills are developed in the quickest amount of time possible. Ideal for self-study, the friendly instructor reinforces instruction, and patiently helps with small difficulties, providing extra exercise to eliminate weaknesses. Each lesson is modeled on English sentences, helping emerging typists to feel more relaxed as they construct familiar words. Occasional nonsense drills are included to build
