

Software- Literacy- Letters and Phonemes

Item	Description	Photo	Price
TF-2206 ABC CD Grade Kindergarten-1, Inclusion			1 User \$59.95
Details	<p>Have you ever seen the letter 't' turn into a tadpole? The talking animated alphabet will bring all 26 letters to life for young children. Their delightful guide does flips, twirls, grins and congratulates kids with "All Right!" as they progress through the program. Children work to improve visual discrimination as they identify letter shapes; and auditory discrimination as they listen to letter sounds. Activities such as "I Spy" and "Matching" make learning the alphabet fun for kids, especially when they get to see letters morph into objects before their very eyes. The program is designed with simple controls and clear speech so that young children can use it independently. Teacher Options lets teachers select difficulty level, choose games, and target letters for each student.</p> <ul style="list-style-type: none"> • Interactive activities make learning the alphabet fun. • All 26 letter shapes and sounds explored. • Letters morph into objects. • Enthusiastic guide encourages young learners. • Special controls let teachers set up program for independent use. <p>Minimum system requirements Win 3.1, 486 66 MHz, 8 MB RAM, SVGA, 2x CD Mac OS 7+, LC475, 8 MB RAM, 2x CD, 640 x 480, 256 colors</p>	 	5 Users \$179.85 10 Users \$299.75 25 Users \$599.50 Network \$449.95

SL-AF1 Alphabet Fun	<p>Complete Package on one hybrid Win/Mac CD:</p> <ul style="list-style-type: none"> - Alphabet Strip with pictures and words - Alphabet Posters for all letters --plus th, ch, and sh - Alphabet Book: each page has a sentence stressing the letter - Activity for each letter with accompanying language development lesson - Add new language-based activities to your supply of alphabet materials! 		\$35.00
TF-2081 Alphabet Track	<p>Grades Kindergarten-2, Inclusion</p> <p>Pre-school children can get a head start on the path to academic success by practicing with Alphabet Track, and older learners who may struggle with reading challenges such as dyslexia will also benefit from the motivating activities. Learners will finally get a solid grasp on their abc's with this first program of the literacy skill-building Track Series. In addition to helping students learn the names of letters and practice alphabetical order, this software helps improve short term memory as it asks students to recall alphabetic sequence. By learning to recognize and locate letters of the alphabet quickly and consistently, students of all levels will acquire more spelling independence and be on track for developing dictionary skills and other vital literacy skills.</p> <p>Minimum system requirements Win 95, Pentium 133 MH, 32 MB RAM, sound card. Mac OSX compatible</p>		1 User \$69.95 Other Options

TF-20107 Letter Olympe - For B/D Reversals
Grades Kindergarten-2, Inclusion; [switch accessible](#), Win/Mac

Details Young learners and students with dyslexia alike will love taking the sporting challenges while working on b and d reversals. Activities cover recognition, discrimination, and differentiation for lower case letters b and d, with full auditory and visual instructions emphasizing accurate sound pronunciation of the b and d phonemes.

Activities target: Visual motor and letter formation, Visual memory and sequential memory, Visual Closure, Visual discrimination, Figure ground skills, Spatial memory, inference and deduction

Sporting themes include: hurdles, track races, ice hockey, diving, tennis, skiing, motor, racing, golf, 10 pin bowling.

1 User **Making Sense with Letters**

IT-MS02 Different word building activities using 300 different graphics and sounds. Find the initial sound, fill in the missing letter, listen and type and unscramble the letters. Making Sense with Letters is designed for pre-school and pre-literacy use, to help develop visual perception, memory and language skills. There are 9 different activities, some requiring auditory perception as well as visual perception. Rewards take the form of a picture of the completed word, together with speech.

TF-2074 Phoneme Track Software

Grades Kindergarten-2, Inclusion; [switch accessible](#)

Details

Bundle

This program increases confidence with reading and spelling more complex words. Phoneme Track encourages learners to develop phonemic awareness by encouraging lots of talking, listening and playing with sounds. Tasks include:

- *Phoneme Take-Aways* - "bill" take away phoneme "b" = ill
- *Phoneme Changes* - replace phoneme "o" in "log" with "e" = leg
- *Phoneme Chains* - hear a sequence of 5 words. Change one phoneme at a time to give the correct chain such as "cot-cut-hut-hug-jug".

Minimum system requirements
Win 95-XP, Pentium, 133 MHz, 32MB RAM, sound card
Mac OSX compatible

TF-20174 Phoneme Track Workbook

Grades Kindergarten-2, Inclusion

Details

Suitable for K-3 students, it is also ideal for older learners who are experiencing specific phonological difficulties. Phoneme Track Workbook encourages learners to develop phonemic awareness by encouraging lots of talking, listening and playing with sounds.

TF-2161 Phonics 1

Kindergarten - Grade 1, Inclusion

Details

Bundle

Each of the 4 Phonics programs follows an easy-to-use layout, based around 3 sequential activities for teaching each letter/sound relationship: Start by selecting a target sound from the group such as 'b'. Listen to a captivating story that includes many 'b' words. Next, students are challenged to find the 'b' sound on each story page. Finally, learners will create words from a selection of letters and letter sounds with common distracters. Students will be captivated as they separate sounds into groups, select a sound and play the three activities for every sound!

TF-20158 **Spell Track Workbook**
Grades Kindergarten-2, Inclusion

[Details](#)

By circling (tracking) each letter in one continuous movement, at the same time as saying the letter name, the learner is using visual and kinaesthetic senses as well as learning the phonic components of the word. Writing out the spelling from memory, saying the letter names or mnemonic as he or she does so, provides reinforcement of correct letter formation and good handwriting.

Teach Me Nouns Series [More on Nouns Series](#)
[See individual units below](#)

Teach Me Nouns is for students with articulation, sound production and speech production goals. The series has over 700 vocabulary words organized by target sound. Using the SoftTouch morphing activity, these programs help students make the connection between a photograph, line drawing, symbol and text for each word. These Steps to Learning Programs give you the ability to select specific words for each student. Music, movement, morphing and narration engage and motivate the students to select the words at their own pace and as often as they wish. Using the powerful changeable format, you can place the target words in different locations to ensure the students are making purposeful choices. you can also increase or decrease the number presented at one time to simplify or make the task more complex. As students choose the words over and over, they learn to hear the sound and often increase their ability to say the words. (Previous version was called Teach Me Phonemics.) Windows/Mac CD-ROMs

[More on Teach Me Nouns Series](#)
